## Replacement and Maintenance

Notice: Please switch off the power supply before replacing or maintaining it to avoid electric shock.

### ELECTRICAL SPECIFICATIONS

1. The input voltage is DC 5V-2A.
2. The lamp uses the LED light source, 12W.

### USAGE AND MAINTENANCE

1. Please keep the surface of the fitting clean in order not to affect the magnification and lighting performance. Gently sweep off dust with a clean rag if there is any dust on the surface.
2. Please don't get paint or any other chemicals on the fixture to avoid any discoloration or damage.
3. Do not change the structure of fitting casually. The manufacturer is not responsible for any damage or personal injury caused by improper use or replacement of the product by itself.

## IMPORTANT NOTE:

- ① If the product was damaged while opening the package, please contact **Amazon Customer Service**.
- ② If the LED light is not turning on or the power adapter is not functional or if you have any other questions, please contact **our service team**.
- ③ You can install the clamp onto a table which the table has **a plain exposed flat edge**.
